 January 29, 2010**

ABRAZIL, LLC announces new Mycelia Powder products grown in the USA

Expected Availability Pricing Rate: Immediate

NEW JERSEY — January 29, 2010 — As one of the leading mushroom grower in Brazil

since early 1960, today we are proud to add in our products line an extensive line of mycelia biomass to complement our line of mushroom's product. The Mycelia will be available in both freeze dried and air dried powder.

The lead time for the freeze dry mycelia will require more planning due to the use of outsourced freeze drying process, but the air drying mycelia is ready to receive large scale order from the industry.

We believe mycelia products will complement the fruit body mushrooms

Latin Name	Common Name	Mushroom Type
